Where a note or rhythm is unclear, best guess has been used. Where Brendan made mistakes I have transcribed what he was most likely trying to play. It is not always clear where octaves are double so usually the top or bottom octave can be omitted for easier playing. The tonality is not obvious (between major and minor) however I have transcribed into a major key. Notes below:

Run not rhythmically exact, rhythm is flexible

This run was not played but may be preferred.

b37. the above was played in performance however I have notated the bass riff used in the rest of the piece

2

Top/bottom A octave double can be omitted if necessary
